

EADV Fostering Specialist Course Advanced STIs

This exciting three-day course will explore a variety of current and cutting edge topics in venereology. All course speakers are experts in their field and have been recognized as excellent educators.

Among the discussed topics will be:

- Current opinions in HIV treatment including Pre and Post Exposure Prophylaxis (PrEP and PEP)
- Basic research and the immunology of STI
- A crash course how to do motivational interviewing to influence risk behaviour in high risk STI patients.
- HIV indicator dermatologic diseases
- Special populations: Sex Workers, Travellers, Men Who Have Sex with Men
- And many more....

The session on HPV related disease will include a live video demonstration of the high resolution anoscopy procedure performed at the department of dermatology of the University of Amsterdam Academic Medical Centre.

This course will be organized in the vibrant city of Amsterdam and course participants can take part in a boat trip with wine and cheese free of charge along the world famous canals of the Dutch capital.
