

***Tropical Dermatology –
A challenge in times of worldwide climate change and migration***
Symposium organized by the Tropical Dermatology Task Force (TDTF, EADV) and Gloderm

The aim of this symposium is to update the European dermatologists on tropical diseases of increasing relevance in times of climate change and migration.

The Symposium is organized by the TDTF together with Gloderm (www.gloderm.org), an international organization established to build connections between dermatologists, trainees, and health professionals around the world.
