# EADV Winter School of Genodermatoses

- **Report on the 3rd EADV Fostering Dermatology and Venereology training course Genodermatoses from 16 -18. January, 2012 in Salzburg and Innsbruck, Austria.**
- For this training course we had 15 participants from 10 countries geographically ranging from Portugal to Aserbaidshan.
  - The **first day** started with basic lectures on genetic traits and epidermolysis bullosa as well as porphyrias. Afterwards, first impressions on molecular diagnoses procedures were delivered.
  - On the **second day**, the participants presented their case reports and laboratory work on molecular diagnoses of rare diseases was finalized in the afternoon. Then the participants were transferred to Innsbruck.
  - On the **third day**, a morning session was delivered in Innsbruck that focused on ichthyosis (disorders of cornification) with lectures on its biology and clinical features. Case reports and a lecture on connective tissue diseases followed before a general discussion and answer session finalized the program.

The participants of the Winter School in front of the EB house Austria.

The next Winter School is planned for January 2014 to be held on 4 days.
